TECHLAW.FEST 2022

Opening Remarks*

MR EDWIN TONG SC

Minister for Culture, Community and Youth and Second Minister for Law
Ministry of Culture, Community and Youth & Ministry of Law (Singapore)

DAY 1
20 JULY 2022
0930 - 1030 GMT+8

Mr Edwin Tong SC, Minister for Culture, Community and Youth and Second Minister for Law, Ministry of Culture, Community and Youth & Ministry of Law (Singapore), will deliver the Opening Remarks

**In-person attendance for this session is by invitation only.*

All other attendees can tune into this session online.

ASIA-PACIFIC LEGAL INNOVATION & TECHNOLOGY ASSOCIATION (ALITA) AWARDS 2022

ALITA's steering committee co-chairs Brian Tang and Adeline Chin will host ALITA's annual awards at TechLaw.Fest to recognise outstanding legal innovators and technologists that impact the Asia-Pacific region (defined broadly). Our in-person and virtual audience will have the opportunity to view the video presentations showcasing our talent and innovators from across the region.

DAY 1: EXPERIENTIAL EXHIBITION 20 JULY 2022

1200 - 1230 GMT+8

FORCES TO BE RECKONED WITH IN LEGAL INNOVATION & LEGAL TECH ACROSS APAC

▼ **Award Category - ALITA Outstanding Legal Innovator Award (Law Firm)**

This award recognises a law firm that has implemented outstanding innovation capabilities in improving either internal workflow or an industry practice through new initiative(s) and/or product development(s).

Presented by: **JUSTICE AEDIT ABDULLAH**

▼ **Award Category - ALITA Outstanding Legal Innovator Award (Industry)**

This award recognises an outstanding industry player (including in-house legal and compliance teams, law school, service and/or tech provider) that has demonstrated implementation of an outstanding legal innovation.

Presented by: **JUSTICE AEDIT ABDULLAH**

1330 - 1400 GMT+8

RISING STARS OF THE LEGAL INNOVATION & LEGAL TECH INDUSTRY

▼ **Award Category - ALITA Outstanding Legal Innovator (Legaltech Entrant) Award**

This award recognises an outstanding emerging startup that has substantial potential to scale, significantly transform the legal landscape in the future and adopt innovative or breakthrough technologies.

Presented by: **MR PAUL NEO**

Chief Operating Officer, Singapore Academy of Law

▼ **Award Category - ALITA Outstanding Legal Innovator (Individual) Award**

This award recognises the recent efforts of an outstanding individual who has significantly contributed to the field of legal tech and/or legal innovation in APAC.

1500 - 1530 GMT+8

INNOVATIVE LEGAL TECHNOLOGY PROJECTS POSITIVELY IMPACTING OUR COMMUNITY

▼ **Award Category - ALITA Legal Innovation and Technology for Good Award 2022**

This award recognises an outstanding community or grassroots initiative that has helped increase access to justice and/or improve awareness of legal rights through technology and/or innovative means.

Presented by: **MR JIA HANG**

General Manager - South East Asia, Ant Group

21 JULY 2022

0930 - 1100 GMT+8

1.5 Public CPD Points

LEADERS
DIALOGUE

SYNOPSIS

Building on the on-demand video entitled “What is the metaverse and Why You Should Care”, this session sets out to provide a framework for understanding the key issues at the intersection of the laws that govern how we live, work and play in the digireal spaces of the metaverse and how those spaces are being designed and managed by businesses. Central to the discussion is the matter of responsible design that responds to ethical and public policy considerations – and the possible legal consequences that flow from such design decisions.

SECURING IDENTITY IN A DIGIREAL WORLD:

Re-thinking Data Authenticity, Portability and Protection

Personal Data Protection Commission (PDPC)

DAY 2: IDENTITY & ECONOMY

21 JULY 2022

1200 - 1330 GMT+8

1.5 Public CPD Points

LAW OF TECHNOLOGY

SYNOPSIS

Alice, in Wonderland, remarks: “Who in the world am I? Ah, that’s the great puzzle.” This existential conundrum lies at the heart of how the law wrestles with protecting and securing identity online. Using the context of online gaming and the expanding metaverse as a context for the discussion, this panel explores three dimensions for securing identity across physical and digital reality. Brought into sharp focus are the issues of interoperability and portability of personal data across metaverse platforms. The panel will dive into an examination of the growing risk of ‘identity harms’ from identity theft and doxxing, to the use and abuse of burner identities. The panel will also discuss the implications of digital personas and physical-world identity on how personal data is framed and treated under laws and regulations governing their protection and use.

THE VIRTUAL LAWYER:

How Digitalisation is Changing the Business of Law

DAY 2: IDENTITY & ECONOMY

21 JULY 2022

1430 - 1600 GMT+8

1.5 Public CPD Points

TECHNOLOGY OF LAW

SYNOPSIS

The past two years have forced a reckoning that the brick-and-mortar law office may not be as essential to lawyering as was assumed by many for a long time. But while many legal professionals are now open to acknowledging that space in 'the cloud' is probably the only essential space they really need, what are real-life examples for how this mindset shift is resulting in changes in how legal professionals run their law practices and departments? What has been the impact on client communication and interaction, collaboration with colleagues, and operating costs? In this session, we hear from a range of legal professionals wrestling with digitalisation and the business of law. We hear, first-hand, the challenges they have encountered and the conditions that they have had to create for success; and their wish-lists for how legal industry regulation and culture can better support their efforts.

21 JULY 2022

1700 - 1830 GMT+8

1.5 Public
CPD Points

LAW OF TECHNOLOGY

SYNOPSIS

Is a bank a technology company or vice versa? Should it be? Our financial systems and its institutions are facing a time of existential reinvention. Traditional financial services systems are premised on intermediaries to manage flows of funds between parties. Regulatory structures and laws have evolved to address this centralised model of finance and financial institutions generate their value based on this traditional model. So what are the implications of decentralised finance on such a model and how does that impact how we approach financial services laws and regulations? As the boundaries collapse between physical and digital economies, and the role of banks and technology companies blur, how can we size up and address the legal stakes? In this panel, experts break the issues down and offer insights for how we might regulate and legislate in new ways to address legal risk and gaps.

HELLO WEB 3.0... MEET LAW 3.0:

Understanding the Legal Challenges Posed by the Metaverse and
Decentralisation and Suggestions for New Legal Approaches

MR CHIA HOCK LAI
Co-Chairman

DAY 3: ECONOMY & SECURITY

22 JULY 2022

0930 - 1100 GMT+8

1.5 Public CPD Points

LEADERS
DIALOGUE

SYNOPSIS

We are used to living in a centralised world, with the heralded benefits of hierarchical relationships and formal authority and trusted proxies. Consequently, our legal frameworks have been developed to reflect and reinforce a centralised world.

With the rise of the use of the metaverse, Web3 and blockchain technology, promising benefits of decentralisation, trustless systems, peer networks, and consensus as an alternative way of organising how we transact with each other, how will our legal frameworks respond and evolve? In the session our panel will test and examine whether the metaverse presents a new world order with new promises and opportunities; present an understanding of the legal challenges posed by Web 3.0 and decentralisation and provide suggestions for new legal approaches.

LAWYERS IN THE METAVERSE:

Real-life Use Cases for Virtual Reality Tools

Moderator:

DAY 3: ECONOMY & SECURITY

22 JULY 2022

1200 - 1330 GMT+8

1.5 Public CPD Points

TECHNOLOGY OF LAW

SYNOPSIS

Many are quick to dismiss the metaverse as a fad. Yet, the interest in all things metaverse is resulting in the development and enhancement of accessible, consumer, virtual and extended reality technologies. In the panel, we look at how law firms, legal departments and legal education institutions are making use of these tools for a range of purposes. From marketing to team collaboration and simulation, we look at case studies for how the metaverse is being utilised by the legal industry to advance and achieve some very practical outcomes. Is there a viable digireal future for legal services? Is that future already here and just not evenly distributed yet? We have the panel weigh in and share their innovation and implementation insights.

WHAT HAPPENS IN THE METAVERSE DOESN'T STAY IN THE METAVERSE:

How Laws Apply Such That In-world Crime Could
Mean Real-world Punishment

MR SHAUN LEONG

(SUSS)

DAY 3: ECONOMY & SECURITY

22 JULY 2022

1430 - 1600 GMT+8

1.5 Public CPD Points

LAW OF TECHNOLOGY

SYNOPSIS

Crime in the metaverse is a complicated side-effect that legal frameworks will need to grapple with. Are existing laws, premised largely on the physical world, fit for use in the metaverse? How can they be applied to ensure appropriate legal consequences are brought to bear when conduct is partially or wholly in the metaverse? Can the metaverse be “self-governing” and who is ultimately accountable for any consequences that flow from in-world activities?

RE-VIEWING THE LAWS OF THE METAVERSE:

Issues of Property Ownership, IP Rights, Content
Regulation, Data Sharing and Transparency

DAY 3: ECONOMY & SECURITY

22 JULY 2022

1700 - 1830 GMT+8

1.5 Public
CPD Points

LAW OF TECHNOLOGY

SYNOPSIS

In recent times, the metaverse has engendered much controversy and excitement within the legal and technology communities. From the internet as we know it, the metaverse has come to be known either as the integration of additional information over reality (augmented or mixed reality technologies) or as an entirely virtual and limitless world that may be navigated and explored (virtual reality). This augmented or virtual world occurs right before us through vision in the form of a head-mounted display, operating alongside audio or haptic sensory feedback that is elicited from worn devices. The current and potential applications of this new technology are ad infinitum. Many issues of property and intellectual property ownership, together with content regulation (particularly over controversial and unlawful material), data sharing and transparency have arisen as part of the current discourse that surrounds the metaverse. Join this august panel of well-known experts, as they traverse the new questions that arise in this new world and offer thought-provoking answers and possible solutions to the challenges posed.
